

Foundations

The visual foundation of Everyday Eats: colour, typography, spacing, shape, elevation, sizes and motion. Every value on this sheet is read from tokens.json, the source of truth for values.

Colour

Palette “Clean warm”. Roughly 85% of a screen is neutral, 10% terracotta, 5% everything else. Terracotta means “act” or “this is on”; herb is an accent, never a second primary. Screens use semantic tokens only.

SEMANTIC - TEXT		
	color.text.primary	[color.neutral.ink] Body text, headings, all numbers
	color.text.secondary	[color.neutral.walnut] Metadata, captions, units, helper text
	color.text.disabled	[color.neutral.stone] Disabled text
	color.text.on-action	[color.neutral.white] Text and icons on primary buttons
	color.text.accent	[color.terracotta.500] Text links, active tab label
	color.text.on-accent	[color.terracotta.700] Text on Terracotta 50 (selected chip, cooking-style tag)
	color.text.on-accent-secondary	[color.herb.700] Text on Herb 50 (diet tags)
	color.text.placeholder	[color.neutral.stone] Placeholder text in fields

SEMANTIC - SURFACE		
	color.surface.page	[color.neutral.cream] App background
	color.surface.raised	[color.neutral.card] Sheets, inputs, tab and action bars, nutrition panel, bookmark button
	color.surface.sunken	[color.neutral.oat] Search field, snackbar, info note, photo placeholders, disabled button, empty-state icon circle
	color.surface.accent	[color.terracotta.50] Selected chip fill, cooking-style tag
	color.surface.accent-secondary	[color.herb.50] Diet tags
	color.surface.scrim	[color.ink.alpha.40] Behind sheets and dialogs
	color.surface.highlight	[color.ochre.50] Search-match highlight behind the matched term, always with an underline so it never relies on colour alone

SEMANTIC - BORDER		
	color.border.subtle	[color.neutral.hairline] Card, chip and panel outlines, list dividers, top bar and tab bar edges
	color.border.default	[color.neutral.stone] Text inputs, outlined buttons, unselected radio ring (3:1 boundary)
	color.border.selected	[color.terracotta.500] Selected filter or unit chip
	color.border.focus	[color.neutral.ink] Keyboard focus (focus-visible) and the field being typed in: a 2px Ink outline, 2px outside the element. Never shown after tapping a button. Ink reads on Cream (16.8:1) and on terracotta fills (3.4:1)

SEMANTIC - ACTION		
	color.action.primary	[color.terracotta.500] Primary button fill
	color.action.primary-hover	[color.terracotta.600] Desktop only (reserved). Not used in the mobile app.
	color.action.primary-pressed	[color.terracotta.700]
	color.action.disabled	[color.neutral.oat] Disabled button fill

SEMANTIC - ICON		
	color.icon.primary	[color.neutral.ink]
	color.icon.secondary	[color.neutral.walnut] Inactive tabs, secondary icons
	color.icon.accent	[color.terracotta.500] Active tab, saved bookmark, selected radio, action-row arrow
	color.icon.accent-secondary	[color.herb.500] Reserved. Herb is an accent, never a second primary
	color.icon.placeholder	[color.neutral.stone] Photo placeholder icon

Typography

One typeface, Schibsted Grotesk (weights 400, 500 and 600), for headings, body, interface and every number. Hierarchy comes from size, weight and tracking. Numbers use tabular figures; units sit beside them in Walnut.

Aa

Schibsted Grotesk

Regular 400 · Medium 500 · Semibold 600

ABCDEFGHIJKLMN O PQRSTU VWXYZ abcdefghijklmnopqrstuvwxyz 0123456789

Schibsted Grotesk, system-ui, sans-serif

Display typography.display 40 / 44 · 400 · -0.02em	Everyday Eats	Reserved; onboarding is out of v1
Heading 1 typography.heading.1 32 / 38 · 500 · -0.015em	Roasted tomato and white bean stew	Screen titles (including “Everyday Eats” on Home), recipe name on detail
Heading 2 typography.heading.2 24 / 30 · 500 · -0.01em	Quick weeknight dinners	Section titles, featured card title, the Ingredients and What’s in it headings
Heading 3 typography.heading.3 20 / 26 · 500 · 0	No saved recipes yet	Option card and sheet titles, the empty-state title when nothing is saved yet, recipe name in Today’s pick. Recipe cards use component.card.title
Title typography.title 17 / 24 · 600 · 0	Check nutrition	Home action-row titles, the empty-state title for no results and the empty builder
Body large typography.body.large 17 / 26 · 400 · 0	Understand what you eat. Enjoy what you make.	Home tagline, recipe descriptions
Body typography.body.default 15 / 22 · 400 · 0	A cosy one-pot dinner with sweet roasted tomatoes.	Default text, ingredient lists
Body small typography.body.small 13 / 18 · 400 · 0	30 min · Serves 4 · 465 kcal per serving	Metadata, helper text
Label typography.label.default 15 / 20 · 500 · 0	Calculate nutrition	Buttons, links, field labels, snackbar
Label small typography.label.small 13 / 18 · 500 · 0	Vegetarian	Chips, tags, tab labels (600 when active)
Overline typography.overline 12 / 16 · 600 · 0.06em · uppercase	DINNER · 30 MIN	Category above a recipe title, section labels (“Start checking”). Never on nutrition results
Number XL typography.number.xl 44 / 48 · 600 · -0.02em · tabular	412	Hero calorie value
Number M typography.number.m 17 / 24 · 600 · 0 · tabular	18 g	Macro values, per-serving figures
Number S typography.numbers 13 / 16 · 500 · 0 · tabular	27 g	Values in chips and compact labels (13/16 500). List and card calories use their own component styles: component.list-row.value and component.card.kcal
Unit typography.unit 13 / 16 · 500 · 0	kcal per serving	Unit beside a number (“18 g”, “194 kcal”), in Walnut. Its own 16px line box, so the number’s line height holds: macro rows stay 24px, list values 22px

Spacing

4px base, 8px rhythm. Every padding, margin, gap and component size is a multiple of 4. Space grows with the level of grouping: tight inside a component, wider between components, widest between sections. The bars on the left are drawn at four times their size.

space.1	4px		space.inline.tight	{space.1} = 4px	Icon to label, number to unit
space.2	8px		space.inline.default	{space.2} = 8px	Between chips
space.3	12px		space.stack.tight	{space.3} = 12px	Heading to its text
space.4	16px		space.stack.default	{space.4} = 16px	Stacked form fields
space.5	20px		space.stack.cards	{space.6} = 24px	Between content blocks
space.6	24px		space.stack.section	{space.8} = 32px	Between sections
space.8	32px		space.stack.major	{space.10} = 40px	Before a major section
space.10	40px		space.stack.hero	{space.12} = 48px	Before Home’s Quick weeknight dinners
space.12	48px		space.inset.card	{space.16} = 64px	Large-screen section breaks
space.16	64px		space.inset.panel	{space.3} = 12px	Recipe card text block: 12px on every side, so card text lands on the 20px text line (8px grid inset + 12px)
			space.inset.option	{space.6} = 24px	Nutrition summary panel
			space.inset.option	{space.5} = 20px	Option card padding
			space.screen.margin	{space.5} = 20px	Mobile screen side margin
			space.grid.gutter	{space.2} = 8px	Recipe card grid: 8px between cards
			space.grid.inset	{space.2} = 8px	Two-column recipe grid: 8px from the screen edge (the grid extends 12px into the 20px screen margin)

Radius, borders, focus and elevation

Flat surfaces with hairline outlines. One focus style everywhere. Shadows only where something floats: the tab and action bars, the bookmark over a photo, sheets and snackbars. No gradients.

Save control

The labelled save toggle, used where saving a dish is the screen's own action: both dish results, in the action bar. Not saved: the primary style with an outline bookmark and “Save”. Saved: the selected style (Terracotta 50 fill, 1px Terracotta 500 border, Terracotta 700 text) with a filled bookmark and “Saved”, so the state never relies on colour. Tapping either toggles it and shows a snackbar with Undo. Recipes are saved with the compact bookmark button instead, on cards and on Recipe detail.

Save

Not saved
aria-pressed="false"

Saved

Saved
aria-pressed="true"

Dish result actions

Both nutrition results for a dish end in an equal-width pair, 12px apart: the secondary action, then Save. A searched dish can be saved and its portion adjusted, but never edited: Edit dish appears only on dishes the user built.

Focus

Bookmark button

The one way to save a recipe: on recipe cards and on the Recipe detail photo, and the remove control in My dishes rows. A 36px Card circle with a 20px bookmark inside a 44px target: outline in Ink when not saved, Fill in Terracotta 500 when saved. No label and no terracotta fill, so it stays secondary to the food. It toggles and shows “Saved to Saved recipes” or “Removed from Saved recipes”, with Undo.

Not saved
aria-pressed="false"

Saved
aria-pressed="true"

Over a photo
Recipe detail: top right of the photo, 12px in, elevation.1 on the circle

Home action row

Home only. Transparent on Cream with a hairline border and 16px padding. A small 40px Oat circle holds the 20px icon of the tab the job belongs to (Leaf for Check nutrition, Book for Find a recipe) in Ink; the terracotta arrow stays the only colour in the row.

Check nutrition

Search a dish or product, or build your own.

Default

Find a recipe

Find recipes by meal, time or dietary preference.

Pressed

Find a recipe

Find recipes by meal, time or dietary preference.

Focus

Fields

Search, text and amount fields. Inputs use a 1px Stone border (3:1); the search field sits on Oat with no border and never shows an error.

Search field

48px, radius 12, Oat. 20px search icon in Walnut; a clear button appears once there's text (28px Hairline circle with a 16px X inside a 44px target). It is the only clear control: the browser's own search clear button is hidden. Focus: the 2px Ink outline around the whole field.

Search dishes or products

Icons

One family, Phosphor Regular, with round caps and joins at 24, 20 and 16px. Every icon has the same visible 1.5px stroke at every size: the stroke on the 256 grid is set per size (16 at 24px, 19.2 at 20px, 24 at 16px), never scaled with the icon. Each icon has one meaning: X clears or closes, Trash removes, the filled bookmark removes something saved. Icons mark actions and states only: no decorative icons, and no sparkle, wand or robot icons.

 Selected

Content

Cards, rows and states that carry food and numbers. Food first: photography leads, numbers are the precise caption.

Recipe card

One frame, no nested padding. Radius 16 with a hairline as an inside stroke, so the border takes no space: the 3:2 image fills the full card width and the card clips its top corners. The text block has one padding, 12px on every side: overline, card title (18/24, weight 500), then at most one tag and the kcal line, always last, 12px above the bottom. No tag means no chip and no reserved space. The bookmark sits 8px in from the card edges. In the two-column grid the cards sit 8px from the screen edge and 8px apart (183px wide on a 390px screen), with the search field and filter chips above them on the same 8px edge; text inside a card lands on the 20px text line (8 + 12), the same line as screen titles and section headers. Cards in a row share a height so kcal lines align.

Photo, first tag only

No tag

Saved

Search match

In recipe search results, every occurrence of the search term is highlighted: an Ochre 50 background plus a 1px underline, so a match never relies on colour alone. A recipe that matches by ingredient names it under the title (“With lemon zest”), with the term highlighted.

Match in the name

Match by ingredient

Featured card

The same card and padding at the full grid width (374px, on the 8px edge) with an H2 title. Once per screen, for This week's pick.

Today's pick and photos

Today's pick is a compact editorial recommendation on Home: an Overline label, then a 4:3 photo at 160 × 120 (radius 16, no text on it) beside the recipe name in H3 and one meta line with time, servings and calories. The whole block is one quiet link to the recipe, with no button or arrow. A missing recipe photo is an Oat tile at the image's ratio with one 48px Stone Dish icon centred in it, never a broken image.

Placeholder, 3:2
Recipe and editorial cards

Option card and section header

Option cards explain a type of check on Check nutrition: H3, Body in Walnut and one text link, as a secondary shortcut beside the main search: Build your own on A dish, Scan barcode on A packaged product. Section headers pair an H2 with an optional See all, at least 16px apart; a long title wraps (balanced) rather than crowding the link. On Home, See all has no caret so “Quick weeknight dinners” stays on one line.

Quick weeknight dinners [See all](#)

Dinner [See all >](#)

Breakfast

List rows

Hairline dividers between rows, none after the last. Amounts are exact: the chosen unit, then grams. On nutrition search, the Dishes and Packaged products labels are Overlines in Terracotta 500, so the two groups stand out.

Not counted
No nutrition data: a No data label, never 0 kcal

Recipe ingredient

Empty states

One empty-state component: a neutral Oat circle with an Ink icon (never terracotta), a title over one Body line in Walnut, all centred, and one action, the terracotta primary button (52px, radius 12, 0 24px padding, 24px above it). When a screen or a search has nothing to show, the group is centred in the content area between the top bar and the tab bar, not the whole phone screen, and keeps its own spacing. Only the icon, copy and destination change, and the weight of the circle and title follows the situation: nothing saved yet (Saved recipes, My dishes) has a 64px circle and an H3 title; no results (recipe search, nutrition search, Saved recipes search) has a 48px circle and a Title. In Build a dish, “No ingredients yet” sits in the builder's flow, 24px below the Ingredients heading, with no button of its own: the outlined Add ingredient button follows it.

Nothing saved yet · Saved recipes
My dishes: Dish icon, “Check nutrition”

No results · Recipe search
Also nutrition search (“Build your own”) and Saved recipes search (“Clear search”); centred in the content area on the screen

Build a dish · no ingredients yet
In the builder's flow; the outlined Add ingredient button follows it

Nutrition

One nutrition summary panel everywhere a total is shown: dish results, custom dish results, product results and recipe detail. Every number says what it’s per.

Nutrition summary panel

Card fill, hairline, radius 16, 24px padding. Number XL calories with what they are for in Walnut: “kcal per 100 g”, “kcal per serving (200 g)”, “kcal per bowl (241 g)”, “kcal for 2 bowls (482 g)”, or “kcal per serving” on a recipe, which has no portion weight, a decorative macro bar (8px, 4px gaps, widths follow grams) and a legend with 8px dots; each row is 24px, with the unit on its own 16px line box. Values are always Ink; colour sits beside a number, never on it.

Macro colours

A separate set from the brand palette, contrast-checked on Card. Amber is exactly at the 3:1 graphics minimum, so it never carries text and never gets lighter.

Loading

A skeleton in the panel’s own shape, never a full-screen spinner.

Navigation

Four tabs and one top bar. Back is the arrow alone: the destination is not written next to it, because the previous screen is what the user just saw. Back always returns to the screen the user came from, and its accessible name says where (“Back to search results”). The screen title is an H1 in the content.

Top bar

56px, Cream, hairline bottom edge, a 20px arrow in a 44px target. No text, no centred titles.

Top bar

Nutrition search	Check nutrition
Dish or product result	Search results, or My dishes when opened from there
Build a dish	Check nutrition
Custom dish result	Build a dish, or My dishes when opened from there
Edit dish	The saved dish it edits

Where Back goes

Tab bar

Home, Eat, Recipes, Profile. 84px including the 24px home indicator, Card with a hairline and elevation.1 cast upwards. Active: Fill icon, Terracotta 500, weight 600. Screens under a tab keep it active: Saved recipes, My dishes and Settings keep Profile active.

Home

Eat

Recipes

Profile

Sticky action bar

Holds a screen’s main action. Card, hairline top edge, padding 12, 20 and 32. A hint above the button appears only to explain a disabled state.

One action

Pair

Disabled with hint

Edit mode
Edit dish: both return to the dish

Feedback and overlays

Confirmation stays on the same screen. Snackbars are neutral for saving and removing alike, stay 4 seconds and always offer Undo. Error red is for real errors only.

Snackbar

Full width minus 20px margins, 114in 52px, radius 12, Card fill, Hairline edge, elevation.1 + 2, so it stands off the Cream page; only Undo is terracotta. It always floats near the bottom, 16px above whatever is there: the tab bar (100px from the bottom), the action bar on results (112px), or the 24px safe area on Recipe detail (40px). Never mid-screen or over the main action.

Removed from My dishes

Bottom sheet

Radius 24 on the top corners, Card, elevation.2 over an Ink 40% scrim. Grabber, H3 title with a Close (X) button in a 44px target, content, one primary button. Close and a tap on the scrim leave without changes.

Info note, error and loading

The info note is kept for neutral notices. Errors carry an icon and a plain message. Loading keeps the layout: a spinner inside the control, or a skeleton in the content's own shape.

Info note

Error message

Error red, with an icon

Spinner

Inside controls only

Skeleton card
